

Creating the building blocks for the energy transition

Building back better through innovation with new product and solution launches in 2020

Grid-eMotion™ Fleet:

Launched a game-changing EV charging system for large-scale e-mobility. A full 'grid-to-plug' solution for large-scale public transport and commercial fleets, enabling operators to charge more with less.

TXpert™ Ecosystem:

Introduced the open, scalable and manufacturer-agnostic ecosystem for transformer digitalization. The solution can enable millions of dollars in savings through greater flexibility, efficiency and resilience in electricity networks.

Digital Enterprise became Lumada:

Integrated Hitachi ABB Power Grids' Digital Enterprise flagship solutions of asset and enterprise performance management into Hitachi's Lumada portfolio.
